

Room Setup for Joe Nichols Jr.

Microphone

- Wireless Lavalier Microphone with fresh batteries hooked into the sound system
- Back-up microphone

Stage & Room Setup

- Joe presents in a wheelchair - he needs to be on a stage or riser high enough off the ground for your group to see him
- The access ramp - should be stage left or right NOT center stage
- The stage should be as large as the room can handle - 12' across minimum - 25' across is great
- The front row - should be as close to the stage as possible - since Joe is on a riser and in a chair, this will help with audience connection
